FIRST OFFICIAL STATISTICS USER SATISFACTION SURVEY (OSUSS1)

QUESTIONNAIRE

STRICTLY CONFIDENTIAL AND FOR NON-FISCAL PURPOSES

The information collected during this survey is strictly confidential under the terms of Law No. 2020/010 of 20 July 2020 to regulate statistical activity in Cameroon which, in its section 14 (1), stipulates that “The nominative information relating to a natural or legal person entered in questionnaires during statistical data collection operations may not be used outside the services responsible for such statistical operations” and in paragraph 4 that “In any case, statistical data may not be used for the purposes of fiscal or criminal prosecution or repression”.

June 2022

Background

The National Institute of Statistics (NIS) is the body in charge of coordinating the production of official statistics in Cameroon. Created by Decree No. 2001-100 of 20 April 2001 of the President of the Republic, the NIS is a public administrative institution with legal personality and financial autonomy. It is placed under the technical supervision of the Ministry of the Economy, Planning and Regional Development (MINEPAT). The NIS has the following missions:

- ✓ ensuring the coordination of the activities of the national statistical information system;
- ✓ making available the statistical data and indicators necessary for economic and social management;
- ✓ ensuring the conservation of census and survey files carried out by public administrations and bodies subsidised or controlled by the State;
- ✓ fostering the development of statistical sciences and economic research within its competence, promoting the training of specialized personnel for the functioning of the national statistical information system.

Thus, the NIS is the key public agency responsible for producing official statistics in the country. It is also tasked to provide the coordinating mechanism within the National Statistical Information System (NSIS) to ensure that data and resources can be shared between development sectors effectively and efficiently. The NIS and the other structures of the NSIS (ministries, directorates/agencies and departments), either independently or collaboratively, have been producing statistics and indicators in several areas.

The demand for statistics in recent times does not only emphasize the importance of statistics in the country, but also calls for the strengthening of the NSIS to improve transparency, accountability of policy and decision-making. With the increasing demand, periodic assessment of whether the needs of such users are met or not by data production systems is therefore important. The effective performance of this role is determined by the relevance, quality and reliability of the data produced by the NSIS. Users will be satisfied if they find official statistics reliable and useful for their purposes. This will in turn generate further interest in more statistical products and services.

A means of finding out whether users are satisfied with the statistical products and services offered by the NSIS is to conduct a User Satisfaction Survey. To assess the current satisfaction level of users of statistical products and services, the NIS is conducting an Official Statistics User Satisfaction Survey (OSUSS). This involves all other NSIS structures (ministries, departments/organisations and services) implementing the Cameroon Statistics Development Project. The survey will assess users' perceptions and opinions about statistical products and services produced by the NSIS. Results from the survey will inform strategies for determining the relevance and improving on the quality, reliability and acceptability of statistical products and services in the country. The OSUSS is a nationwide sample survey involving institutions and individuals who have ever used statistical products and services produced by the NIS and other selected NSIS.

Sections of the Questionnaire

The Questionnaire has five sections:

- Section 0 captures information on the identification of the user's structure and some basic information about the structure and the respondent.
- Section A asks general questions about use of official statistics.
- Section B enquires about the quality of official statistics.
- Section C covers questions about Cameroon's National Institute of Statistics.
- Section D contains questions about all other NSIS structures in the National Statistics System.

Please, a trained Official will visit you to assist in completing all the questions that are relevant to you in these sections.
